6. You will receive a message about Kids Mode. Select the OK button.

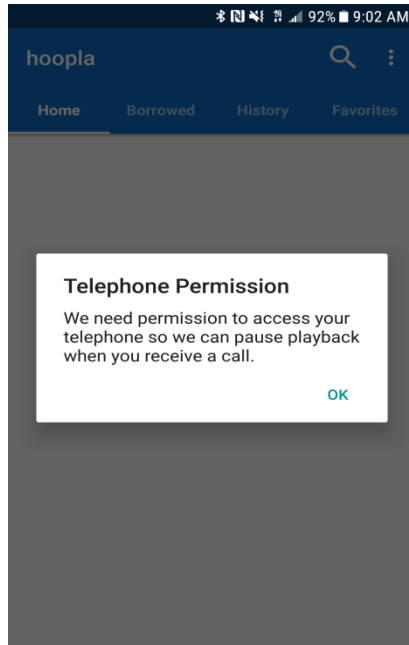

Kids Mode

Kids mode is a discovery tool to find family appropriate content. This will filter out content across the entire platform, including the home page - borrowed, history, and favorites, content landing pages, content details, and search.

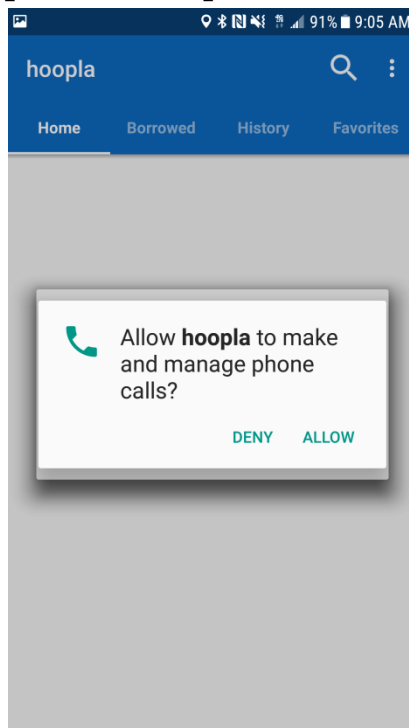

Simply visit your settings and flip the toggle to put hoopla into kids mode on your device. This only affects the device and not your account.

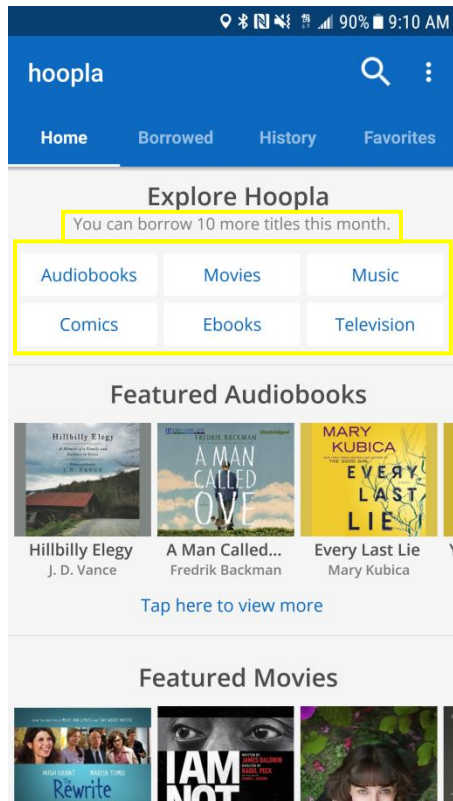

7. You will receive a message asking for your permission for Hoopla to access your phone to pause the audio when you get a call. Select OK.

8. You will receive a message asking if you would like Hoopla to make and manage phone calls for you. Select your preferred option.

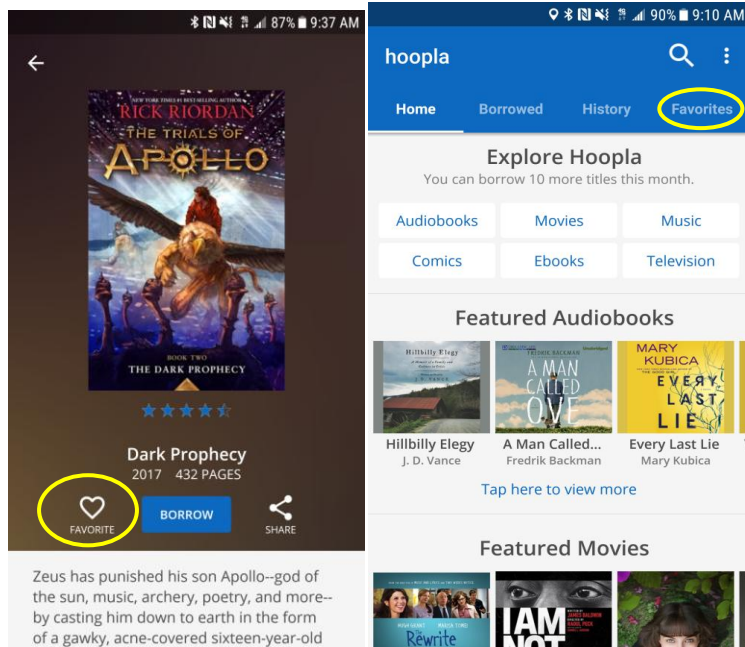

9. The main screen will let you know how many titles you are allowed to borrow for the current month and the different types of items you can borrow.

10. In each section, you are able to view items by genre, recommendation, featured, or popular items.

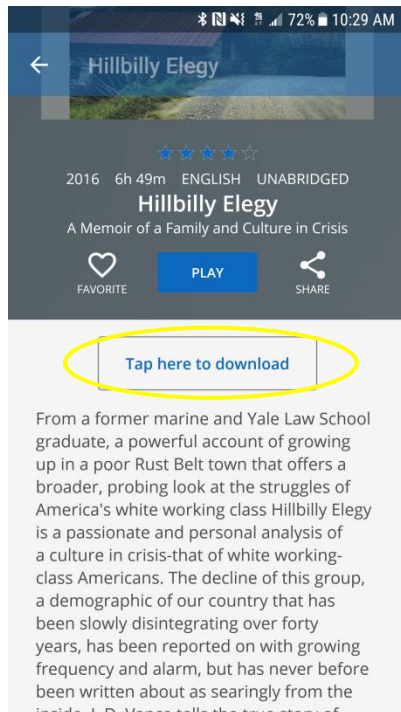

11. When you have found an item that interests you, select it for more information. If it is an item you have already enjoyed, you can select the Favorite button to help Hoopla recommend items for you in the future. You can access a list of your favorite items from the Favorites menu on the main screen. You can also select items on this list for more information.

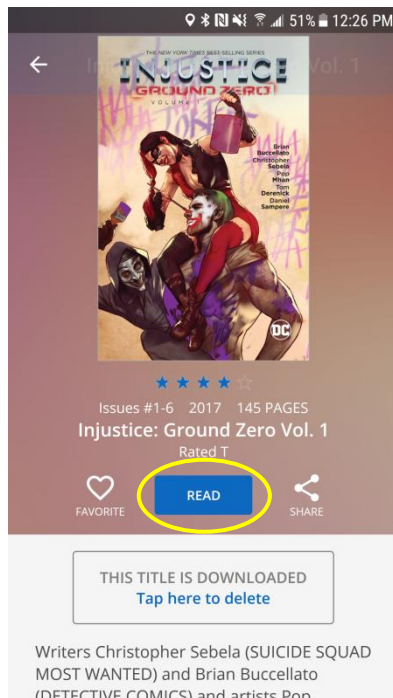

12. When you decide to borrow an item, select the Borrow button on that item's page.

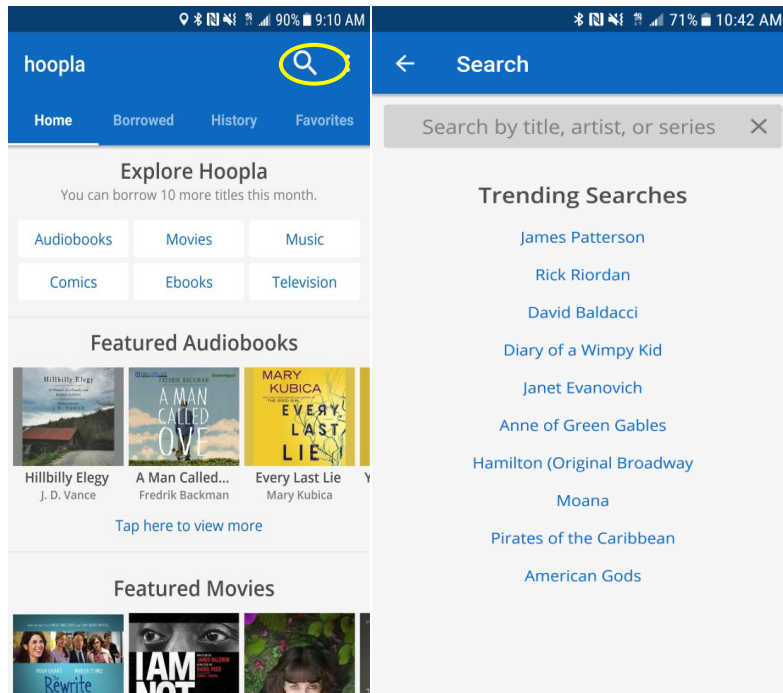

13. If you would like to download the item you borrowed, select the “Tap here to download” button.

14. Once the item has downloaded, select “PLAY” or “READ” to access the item.

15. You can also search for an item by selecting the magnifying glass icon at the top of the main page and entering your search in the gray box.

16. Select an item from the displayed search results for more information.
